AS9100

Meeting AS9100 for Aerospace and Defense Industry

IS YOUR EXISTING SOFTWARE UP TO THE TASK?

If you're a supplier to A&D companies, you're familiar with the challenges of helping them meet exacting standards. You recognize the need to have control over numerous financial and regulatory hurdles.

The big question, then, is can your existing ERP solution keep up with A&D requirements?

The answer has to be no – if your system doesn't provide robust certification document capabilities and traceability.

Consider the comprehensive Guardian ERP Solution, a single source for all your data, from production through distribution and more.

KEY ADVANTAGES OF THE GUARDIAN ERP SOLUTION

- Used extensively by companies with AS9100 Rev. C and D Requirements
- Provides the documentation required for NADCAP Accreditation
- Provides industry-standard certification documents
    - Certificate of Conformance
    - Chemical certifications
    - Mechanical certifications
    - NDT Certifications
- Enables traceability to material lots, employee quality checks, serialization, supplier approvals, and more
- Allows detailed DDMRP and demand planning, including forecasting and part cost analysis, to help you better manage your global supply chain while still maintaining lean practices
- Offers powerful and flexible scheduling tools designed to handle your specific manufacturing processes and materials
- An integrated quality suite to manage nonconformance, corrective actions and document control for enterprise-wide visibility and accountability
- Complete supplier management features for open communication with suppliers through tools like two-way EDI exchange
