Labels

Clients often come to Guardian requesting Custom Labels to address their customer's requirements. In the mid-1980's the AIAG (Automobile Industry Action Group) developed standards for shipping and identification labels. Using this standard, Guardian has developed a large quantity of AIAG labels to address your customer's requirements.

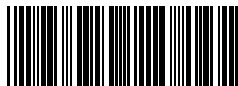

Attached are the "Standard Deck" AIAG labels currently available within Guardian. Custom labels are available and require specifications and definitions.

Guardian support can assist you in setting the appropriate AIAG Label for your Customer.

The screenshot shows the Guardian Version 8 software interface. On the left is a 'Main Menu' sidebar with categories: Sales, Purchasing, and Engineering. Under 'Sales', 'Customer Management' is expanded, and 'Customer List' is circled in red. The main window is titled 'Customer Acme Manufacturing' and shows details for Customer Number 500185. The 'Details' section includes 'Surcharge Info' (with checkboxes for Hide Weight On Invoice, Energy Surcharge, and Finance Charge), 'Invoice Info' (with a checkbox for Group Shipments On Invoice), and 'Serial Numbers Info' (with a checkbox for Track Serial Number By Customer). The 'Shipping Info' section includes checkboxes for ASN Email, Accepts Backorders, Allow Early Ship, Packaging Charge, and Non Disclosure Filed, along with input fields for Overship %, Undership %, Days Early, Days Late, and Transit Days. A red circle highlights the 'Shipping Label Format' field, which is currently empty. Below it is the 'Supplier Number' field. The bottom status bar shows '8.3.1003.23 Guardian Admin GUARD1 GUARDIAN Central Standard Time 1105x686' and 'Full Access' on the right.
