Dameron Alloy Foundries Selects Guardian Software Systems ERP with MES Solution

Multinational precision investment castings manufacturer to manage entire production chain through one integrated system

Oconomowoc, Wis. – [Guardian Software Systems](#) today announced a new partnership with [Dameron Alloy Foundries](#), a manufacturer of precision investment castings. Headquartered in Cypress, Calif. with full in-house CNC machine capabilities and facilities in Calif., Ky. and Mexico, Dameron Alloy Foundries excels as an industry leader with over 70 years of metal casting experience.

As a multinational company with foundries, machine shops and distribution operations servicing high specification industries, Guardian’s ERP with MES solution will empower Dameron Alloy Foundries to optimize operations throughout its entire production chain through one integrated system. It will also provide complete visibility to cost structure, enabling the manufacturer to track and quantify costs in real-time, with complete accuracy.

“Guardian shares our long-standing reputation for effectively sourcing solutions and producing high-quality work we can stand behind,” said Joe DeJulio, Corporate Vice President, Dameron Alloy Foundries. “We were looking for a partner, and throughout the decision process, Guardian consistently demonstrated that shared vision through their customer service, responsiveness, industry knowledge and collaborative nature.”

“We worked closely with the Dameron Alloy Foundries team to really understand their unique needs and identify opportunities to further maximize their expertise,” noted Tim Borchardt, Executive Vice President, Guardian Software Systems. “As an AS91000D and ISO 9001-2015 certified organization that serves the aerospace and defense industry, Dameron Alloy Foundries will leverage the robust certification document capabilities and traceability of Guardian’s comprehensive solution to support them in meeting exacting standards.”

Established in 1946, Dameron Alloy Foundries is dedicated to producing high quality ferrous and non-ferrous investment castings for the aerospace and defense, commercial valve and pump and glass container industries, in addition to various other specialty markets. Dameron Alloy Foundries is committed to customer satisfaction and the integrity of the products it supplies through innovation, technology, teamwork and continual improvement.

About Guardian Software Systems

Guardian Software Systems is a privately held software and services organization and dedicated metal casting provider. With customizable offerings that meet the unique needs of organizations in the metal casting industry throughout the entire production chain, Guardian’s Metal Casting ERP with MES software brings the front office and shop floor together. Backed by 30 years of metal casting industry expertise and first-hand experience in over 250 foundries across the world, the Guardian solution provides organizations with a comprehensive view of their business, arming them with the data and visibility to optimize operations, grow beyond existing KPIs and beat the competition.
